

Back to School:

- Masks will NOT be required during school, students are still encouraged to wear a mask if they feel more comfortable. This protocol may change as the year progresses.
- Masks WILL be required when riding school transportation-This is not a school policy, but a federal mandate that must be followed.
- Commons doors will open at 7:50 am for students.
- Upon entering the building, as well as boarding buses, students will have their temperatures screened.
- Visitors and volunteers should enter through the front doors and will also be temperature screened before entering.

As always, we ask that if you are sick, please stay home!

If there is a lab confirmed positive case:

- If there is a positive case in your household and you ARE VACCINATED, there will be no quarantine required unless showing symptoms.
- If there is a positive case in your household and you ARE NOT VACCINATED, you will be required to complete a quarantine lasting 10 days total for the household.
- For determining return dates, day of onset of symptoms or day of positive test if asymptomatic, will be day 0. Quarantines will be the following 10 days. Positive results must be shared with the school in order to have the absence marked excusable.
- As always, students who present with either a temperature over 100 or vomiting and/or diarrhea will be sent home and should not return to school until 24 hours after symptoms have resolved. New this year, students who present with loss of taste/smell will be sent home and a negative test result will be required before they're allowed to return. Since this is one of the most common signs of COVID, household members will also be sent home and required to stay in quarantine until either a negative test result is received or 10 days have passed.
- We will monitor all other symptoms and determine whether students will need to be picked up, just as we have in the past.
